Assignment 2 Tutor's Feedback [Prof. Godfried Williams].

"There is strong evidence of your understanding of the requirements of the tasks set in this assignment. Detailed modelling and identification of essential data requirements and data items. This work is well referenced with relevant sources.

A very clear rationale and approach. The methodology is sound. The brief explanation of the underlying reasoning of the approach was useful. Very good link and relationship between concepts and design goals. The presentation could have been improved. would have like to see some of the design issues and challenges. There no issues regarding the integrity of this work.

Overall this is an excellent effort."
